

The following slip test results are for Ecoscape UK hollow composite decking boards, tested in July 2013 to BS7976 - 2: 2002.

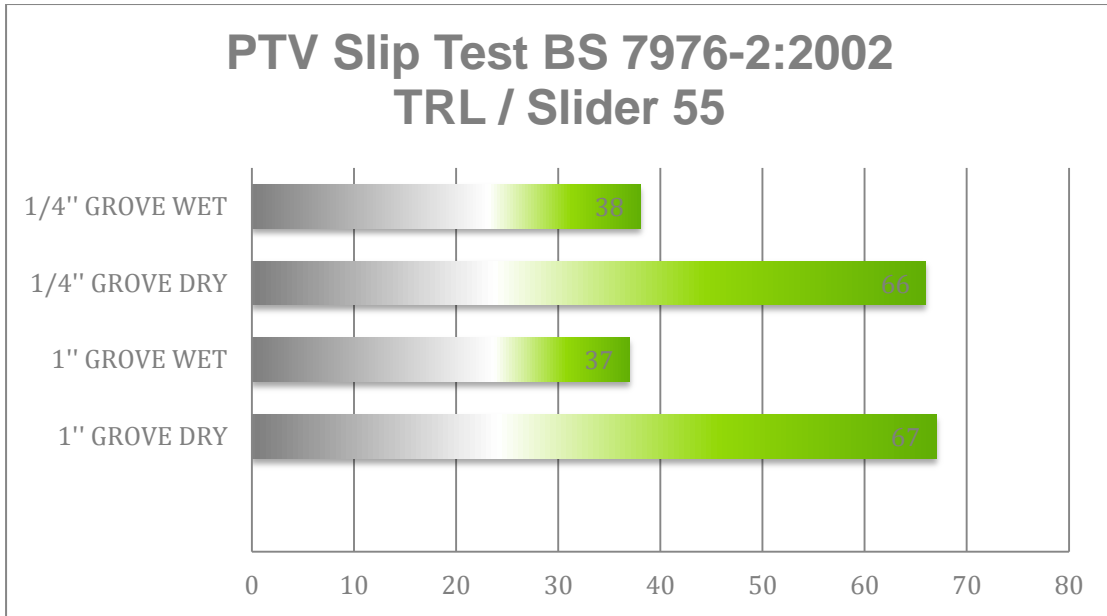

Slip Potential

Test Value

High Slip Potential	0 - 23
Moderate Slip Potential	24 - 34
Low Slip Potential	35 - 60+

The above TRL Pendulum tests were carried out in accordance with the procedure detailed in BS7976 part 2:2002 and the UK Slip Resistance Group Guidelines, Issue 3.

The Pendulum was shod with four S rubber / Slider 96 and tests conducted in both wet and dry conditions. The planks were tested in 3 directions; along, across and at 45 degree angle to previous directions. Both sides were tested.

Slip Potential	Test Value
High Slip Potential	0 - 23
Moderate Slip Potential	24 - 34
Low Slip Potential	35 - 60+

The above TRL Pendulum tests were carried out in accordance with the procedure detailed in BS7976 part 2:2002 and the UK Slip Resistance Group Guidelines, Issue 3.

The Pendulum was shod with TRL / Slider 55 and tests conducted in both wet and dry conditions. The planks were tested in 3 directions; along, across and at 45 degree angle to previous directions. Both sides were tested.
